

# HOLIDAY ACTIVITIES

**GRADE 2**  
Edition 1

Dear Children,

Greetings !

We hope and believe you are doing well under the protection of our God, Almighty. We are happy to get back to you. We understand that you are missing the activities we do at school as much as we miss doing them with you. So, here we go !

Here we have a few activities that you can do while you are at home. Enjoy doing them and explore your creativity. These are just a few ideas to keep you busy. You are free to go beyond them.

This is the first edition of your holiday activities and you will be notified of the next editions as we progress. If you would like to show all that you have done, you can take a picture of your work and with the help of your parents reach your class teachers at the below mentioned email ids. We will be happy and pleased to post your work on our website.

With much regards,  
Your Grade 2 Teachers

# Make your own multiplication facts chapatis

- Next time when you have chapatis prepared at home, this is what you will do.
- You are going to make a multiplication fact chapatis and enjoy eating them.
- Let's make a multiplication fact 2 chapati.
- To prepare it, make 2 holes in each row and write the multiplication fact simultaneously on a note book as you make holes in each row. Refer to the writing pad shown.
- Repeat the multiplication fact chapati for 3 and 4 and write them down.
- Remember to by heart them everyday.

# Paint to make patterns

- Use a coconut shell, scrape it to smoothen it on the outside and paint your own pattern.
- You can also use a waste container, wrap it up with a newspaper and paint your favourite pattern. You can also cut out patterns and stick them.
- Use the container or the coconut shells for storing your small toys or your stationery items.

# Story Time !

## THE GREAT HILL - By Daniel Errico

Before time was time, there was a Great Hill.  
And on the Great Hill there lived the Yolks.  
The Yolks spent their entire lives climbing the Great Hill, trying to reach the top.

Some Yolks climbed fast.  
Some Yolks climbed slowly.  
One Yolk in particular was a very slow climber. He was different than the rest of the Yolks.

When he climbed, all the other Yolks passed him.  
It was hard for him to watch them pass by.  
He felt like the worst climber in the world.  
Some Yolks made fun of him as they passed.  
Others didn't.  
Some Yolks wanted to help him climb but he didn't let them.

It was hard for him to climb. It was even harder when it rained because the ground got slippery.  
Sometimes it seemed like it was only raining on him.

But it wasn't.

There were times when he felt like he wasn't moving at all.  
But he was.

Then one day he met another Yolk who climbed even slower than he did.

He helped the slower Yolk climb.

"Thank You," said the slower Yolk.

"You're Welcome," said the slow Yolk, "I can't be of much help to anyone else since I climb so slowly."

"Slowly?" asked the slower Yolk.

"Well yes. I watch other Yolks pass me all the time."

"I do not know if you are slow or fast, but I do know that you helped me, and that you are still climbing."

The slow Yolk said goodbye to the slower Yolk, and kept climbing.

"Still climbing," he thought to himself.

"That is true."

And he smiled.

So the Yolk kept climbing. He climbed when it was nice out, he climbed when it rained, and he even climbed when it snowed.

As he kept climbing he got better and better. Sometimes he would pass other Yolks and sometimes they would pass him. He had stopped paying attention.

He also noticed that some Yolks were no longer climbing.

When a yolk stops climbing it stays where it is. Some Yolks stop climbing because they are happy with how far they have gone.

Others stop climbing because they don't want to climb anymore.

The Yolks that had stopped climbing did not like to be passed, and they made it harder to get by. But the Yolk kept climbing, right over them!

There were still times when the Yolk thought he was climbing an impossible hill, but he kept climbing.

Always, always, climbing.

Do you think he made the top?

# Let's compare the quantity of pulses at home

- Taking the permission of your parents and choose any 3 pulses. For eg., gram dhal, chick peas and green gram.
- Use any 3 different containers to measure the quantity of these pulses.
- Tabulate your values and compare the difference.
- You will learn that same quantity measures differently when measured in different containers.

**Sample Table**

| Items      | Container 1 | Container 2 | Container 3 |
|------------|-------------|-------------|-------------|
| Gram Dhal  | 3 cups      | 2 cups      | 5 cups      |
| Chick Peas |             |             |             |
| Green Gram |             |             |             |

# So, what did you do today?

- Take your notebook / diary / journal and write down all that you did today.
- This will be your task every night before you go to bed.
- You can even draw and record all that you did.
- You will realize how you have used your day.
- This will be your treasure and a store house of wonderful memories.
