Snippets

Vol. 2 Issue 3
April 2020

A Note From the Editor's Desk

Dear Reader,

The year 2020 began on a promising note for all of us, and has rapidly fallen into difficult times. Worry not! This term's edition of the Snippets is filled with articles about our short, but busy third term. Along with these articles, we have a whole lot of fun projects and activities you can try out, right from the comfort of your home. Remember, the journey of a thousand miles begins with the first step. So, turn off that television, pick up your copy of the newsletter, and let your mind be awakened to the endless possibilities you have in front of you. These days come just once in a lifetime. Spend time with your family, and be creative. Don't be carried away with fear. Take time to pray, take time to know who God is, and know that He is with you always.

Stay safe,

The Editorial Team

A Note from our Principal

Another academic year rolled out, or rather came to a grinding halt. The pace at which we moved as a school was terrific. In a span of 9 months we had about a dozen major events as a school and many more segment wise. It was a non-stop, blurry, rewarding ride; making me wonder why we were moving so fast. On March 16th 2020, our seniormost fledglings moved up to 9th grade and into Highschool-yet another milestone, and I had many reasons to feel grateful and blessed. A few more weeks for the final summative, then wrapping things up and it was onwards and upwards to a new academic year. Or so we thought... Little did we realise that there would be a sudden halt as if Someone who knows it all better, stopped us in our tracks??! So let's take this time to be grateful, to reflect on how well we did our tasks and be wise to use our time carefully. Even as we are planning for some great programmes for the next academic session, make sure that you build on all that you have learnt, enjoy the family times and take time to pray for people across the globe. Remember that even when the best laid plans may not always work out the way we expect them to, we carry on with Faith and Hope. Love you much and waiting to meet you all soon. Always at your service.

Principal Annie Mohan

Primary School Day

On 21st February, 2020, the Christwood family celebrated its 4th School Day with enthusiasm and zeal. Shri R. Buhiril, I.A.S, Secretary to the Government of India, Ministry of Rural Development, was the esteemed guest of honour. Shri Buhiril delivered the School Day address, emphasizing the importance of training children to be godly, upright members of the society who are able to think and make good choices for themselves.

The Chief Guest's address was followed by the entertainment programme, which began with 'Global Worship', a choreo, based on the song, *Lord You are Good*. Students of Grades 3, 4 and 5 carried flags, dressed up as different nationalities and Indian states as they formed an amalgamation of nations and people groups. The entire evening was interspersed with captivating dances by the students from all grades, who danced to tunes such as *Hall of Fame*, *Best Day of my Life* and *Lifeline*.

Any school program is incomplete without magical moments, and with little children around, a fairy tale is always on the horizon. The Grade 1 students beamed confidently with their fantastic performance of *Cinderella*, complete with Ballroom dances, a fairy godmother and of course, a dainty little glass slipper! It was a play about magical moments, never giving up and about believing in your dreams.

This was followed by the Grade 2 students' *Magical Bus – Lost in Space*, which had all the elements of an adventurous trip. Their costumes and backdrops were meticulously crafted and the journey was nothing short of the 'edge-of-the-seat' kind.

Of course, the highlight of the evening was the mini musicale, *Queen Esther: God's Little Heroine* performed by students of grades 5-8. The play revolved around the Biblical character, Esther, a Jewish slave girl who became a Queen and saved her people. The students took the audience on a journey that was filled with heart-touching moments and plot twists, interwoven into a dramatical display of splendor and favour. The main theme of the play was to 'look up', signifying the importance of prayer and trusting God. It was truly a grand and fitting finale for the entire programme.

The audience was visibly impressed by the impeccable performance showcased by the students across different Grades.

KG School Day

Christwood celebrated its KG School Day on February 20, 2020, with great grandeur. The school was decorated and lit up elegantly. The joy and excitement of parents and loved ones filled the air. This spectacular evening was a final product of the process every Christwood kindergartener undertook in their holistic development. Our Chief Guest, Ms. F. D. Initha, Joint Director General of Foreign Trade, Chennai and the Guests of Honor, Mr. Abraham Mani, and Mr. Harris, CEO of TIEKE Pvt. Ltd were welcomed with flowers. After Principal, Mrs. Annie Mohan delivered the Annual Report, the Chief Guest addressed the gathering, encouraging the parents to raise a community of purpose-driven, patriotic and service-minded people, by being efficient guides and empowering supports.

The entertainment began with the Welcome Dance. The first play of the day was *Noah's Ark*, the much-loved Bible story. The splendid performances, dazzling dances, children marching into the Ark dressed as animals, and the soulful symphony of our budding Choir, left the audience in awe. The second play titled *Save Trees*, a musical journey filled with dances, fruits and vegetables ramp-walk ended with a thought-provoking skit that trees are our friends. It delivered a powerful message. The splendor of the finale, when the audience joined our kindergarteners, heartily and harmoniously, in the "Promise song" to save trees, left everyone captivated.

Exciting Happenings

Christwood's Annual Music Concert

Everybody would agree with me that music is a vital component of education. Christwood's Annual Music concert 2020 took place at the Christwood campus on February 14, 2020. This concert was a unique experience, as Kodaikanal International School (KIS) joined us. The purpose of such concerts is to give a high standard of musical exposure to students by creating a good platform to perform. The stage was neat and well organised. A 'demonstrative concert' was held before the evening programme for students who had opted for Music as an After School Activity. It was an eye-opener for us to see several instruments which we hadn't heard or seen before. Students from KIS played many pieces on various instruments, such as the saxophone, clarinet, cello and flute. We were so fascinated.

The evening concert started off with a warm welcome and with Christwood students playing piano pieces. After that, there were many ensembles and choir performances conducted by our music sir, Mr. Emmanuel Prathap Singh. The Senior choir of Christwood School collaborated with KIS choir to sing *I'll be there* and *Happy*. We really enjoyed performing with the KIS students. We thank God for such good opportunity given to us.

Overall, in my opinion, this concert left a positive impression in my mind. I can still picture the freshness of the outdoors in the sunshine of my memory of the day. In conclusion, it was an outstanding concert. It expanded my knowledge and helped me further experience emotions that inspire in the music world.

CHALCY RACHEL K
Grade 8

Republic Day

Republic Day fell on a Sunday this year and a special worship service was organised at the school premises. The day began by the hoisting of the national flag by Pastor Nirmal Kumar, head of *Highway Tabernacle Ministries*, followed by a session of praise and worship. It was an endearing experience for the faculty members as they had the opportunity to worship for the nation together.

Following the worship, the pastor delivered a brief yet relevant message emphasising that God has placed each one of us in India with a purpose and that it is our responsibility, as citizens, to be a testimony wherever we are placed; to live a life of integrity even though we are surrounded by prejudice, bias and corruption. He urged the congregation to pray and respect our leaders, follow our duties while we enjoy our rights, so that as children of God we would lift the banner of Jesus above all.

Math Fiesta

The day dawned bright and clear on the day of our Math Fiesta and we marched to school eagerly. The inaugural programme kick started with prayer. Then, the guest of the day, Dr. Sivaraman, Associate Professor – Department of Mathematics, DG Vaishnav College and Founder of Pie Mathematic Association, was introduced. An eminent mathematician, Dr. Sivaraman threw light upon few aspects of mathematics. The introductory programme also saw few students from Grades 4 and 5 enact a detective story, where the detective uses arithmetic operations to crack a murder mystery.

After the inaugural function, the children dispersed to their allotted classrooms where their math projects were displayed, while some of them went on to attend a math quiz at various venues.

I must say, the entire school was abuzz with mathematical terminologies! The guest, escorted by our maths teachers, went around to have a look at every exhibit. He shared ideas about our projects and kindled our curiosity in the subject. Each of us eagerly awaited our turn to explain our exhibits, which we had been preparing for weeks. People say the only way to learn mathematics is to do mathematics, and I'm glad we did just that!

MAHASVIN K B

Christwood Experiences

Rendezvous with a NASA Scientist

On 13th January, 2020, the students of Grades 7 and 8 eagerly awaited the arrival of Dr. Nelson Leslie Reginald, a scientist from NASA. He narrated his childhood experiences in Sri Lanka and what influenced him to become an Astrophysicist. He discussed about a few issues prevailing in space with a little complicated explanation. He encouraged the students by saying that in future, they could become astrophysicists and find the solutions for those problems. He then talked about the sun and an instrument called "coronagraph". Towards the end of the programme, he patiently answered questions the students had. The time we spent with him was memorable, inspirational and motivational.

SURYA B
Grade 7

Competitions

Apart from our academics, our school conducts many competitions in different fields to bring out the talents within us. Students of Grades 7 and 8 had a number of competitions right from the first term.

The first competition was a Crossword Puzzle Competition, followed by Shipwreck, where our dear Principal was our Captain and we had to convince her as to why our team had to be saved. This was our first experience playing shipwreck and it was a very productive one.

In the second term, we had Just-a-Minute, where a random topic was picked and we had to speak about it for a minute. Initially, we thought it would be easy to speak, but we underestimated it. It was one of the most challenging competitions; spontaneity and creativity are its key elements.

Following this, we had Poetry Writing Competition. I must say it was exciting to try our hand at 'flowery language', thinking of ourselves as young bards!

In the third term, all the nightingales of Grades 7 and 8 were pulled out for the Solo-singing Competition.

These competitions greatly help us in identifying our hidden talents and makes it even more memorable when we learn and work with our friends.

SURYA B
Grade 7

Queen Esther: God's Little Heroine

It was a lovely evening at Christwood School on the 21st of February as the school was celebrating its 4th School Day. There was acting, music and dance by the students of Grades 1- 8. Just as the applause from the dance "Cold Water" was dying down, Ms. Deepika announced the next performance: a play, Queen Esther: God's Little Heroine. This drama, scripted by Ms. Sara Mohan and performed by Grades 5 – 8, revolves around the Biblical character Esther, who is a Jewish orphan raised by her uncle, and is soon selected to be the new queen of Persia. Esther displays bravery, loyalty, selflessness, trust and faith in God throughout the story.

The audience was excited for the drama, but little did they know the chaos and thrill backstage! One of the props was missing and everyone was getting a good dose of last-minute nerves, but that didn't stop the actors from giving it their all onstage. As soon as the stage lit up to the first scene, the audience were on the edge of their seats waiting to see what would happen next.

The story takes place in ancient Persia, ruled by King Xerxes. His queen disobeys him, so he banishes her and then looks for a new queen by having a beauty pageant. Among the contestants is a Jewish orphan girl, Esther. Soon after the dazzling pageant choreography, Esther is crowned queen. Months go by, and Esther comes to know of the evil plans of Haman, a high official in court, against the Jews. Esther comes up with a selfless plan to foil the immoral intentions of Haman, which ends up being successful.

This drama had quite a few songs throughout it, performed by Christwood's Senior Choir with students from Grades 5 – 8. The play's curtain call is in fact an upbeat musical number, "Look Up", which is about always looking for a solution in what seems like an impossible situation.

This had the audience cheerfully applauding the young actors. This drama was certainly a banger of an ending to an amazing, memorable School Day at Christwood!

Grade 8

Easter

Are you wondering what Easter is about? Here's a little poem that explains it in short.

Let me tell you a tale, a tale of old.
A tale told many times over, it's gold!

In the beginning, God created man,
But things didn't go according to His plan.
You see, God loved man and put him in Eden,
But man disobeyed God — the beginning of sin!

And so, man was sent out from the garden of Life,
And had to work the land in toil and strife.
The saddest part was not the sweat of his brow,
But that he was separated from God now.

Fast forward: there's flood, famine, wars and Kings,
As man started to need God, His praises to sing.
You may recognise a few close to God's heart,
Abraham, David, Esther, Daniel to start.

But it wasn't enough; this vast divide
Still kept man away from God's side.
So now, there was only one way God could be with man
It was to send His Son, to redeem man to God's clan.

So Jesus, His Son came to the earth.
We all know the beloved tale of His birth —
Born to a virgin, as the prophets foretold;
All creation waited to see God's plan unfold.

Jesus grew, as a man, perfect and pure,
God's spotless Son, the world's only hope and cure.
He healed, He delivered, He taught, He cared:
God's only Son, whose life was not spared.

Days before His death, the people praised Him as "Lord",
And the very next week, they killed the Son of God.
Nailed to the cross, this symbol of God's love.
Heaven stayed silent, as Jesus looked above.

Who could understand this cruel plan?
The Son of God had to be crucified for the sons of man?
But Jesus died; all our sins and sickness He bore.
Every curse Jesus took on Himself, as the veil finally tore.

Jesus was buried in a tomb. But that's not the end!
Three days later, Jesus rose to life again!
Oh, death could not hold His body down,
As He came back from the grave with a conquering crown!

And so, we celebrate His life today
As sin and death no longer have sway!
We can be with God every moment of our lives
Because Jesus paid for us the highest price!

Easter celebrates what Jesus has done
He fought against death, and victorious He won!
So now, you and I can gladly be
A part of His great big family.

Because of Jesus, God is always near
In troubled times, you don't have to fear!
Remember God is with you, only believe,
And into your heart His salvation receive.

Let's Have Some Fun with Dance and Sports!

Jazz it up!

Jazz is a highly energetic and showy dance style which combines rhythm, expression and technique. The term jazz is shared by a broad range of dance styles such as old school jazz, technical jazz, Broadway, musical, lyrical jazz, street jazz or jazz funk.

Jazz uses waves, fancy footwork, big leaps and quick turns. It incorporates dance techniques of ballet, modern and jazz. Great versatility and strong performance skills on the face and body is crucial to interpret the various jazz styles.

In our school, we focus on this dance form. In the School Day programme, some of the dances were based on a contemporary form of jazz. Find out more about it with the help of your parents.

Did you know?

Olympic medals are not real gold! Gold and silver medals are at least 92.5% silver.

Gold medals must be plated with at least 6 grams of gold. All Olympic medals must be at least 3 mm thick and 60 mm in diameter.

The most participated event on Earth is Fishing.

The first Olympic games took place in Athens, Greece in 1896. There were 311 male contestants there, but no female competitors.

The speed of a badminton shuttlecock can easily go at 180 km/hr. It can, however, go up to 350 km/hr. Wow!!!!

Boxing legend Rocky Marciano invented the fax machine.

In his time, seven-time world champion Michael Schumacher was the highest paid sportsman in the world. Schumacher earned over \$650 million in his career as a F1 driver for Team Scuderia Ferrari.

A cricket ball has between 65 and 70 stitches while every baseball has exactly 108 stitches.

Soviet gymnast Larissa Latynina holds the record for the most Olympic medals ever won. She competed in three Olympic Games, between 1956 and 1964, winning 18 medals in gymnastics.

Golf is the only sport to have ever been played on the moon – Alan Shepard hit a golf ball on 6 February 1971.

Bored out of your MIND? Try these out:

1. Balancing Beam

Stick different coloured tapes on the floor.

Each coloured tape can have a different rule to walk on. For example, you can walk on one leg on the red coloured tape; hop on the blue colored tape and so on.

If you fall off the tape, you're out of the game.

Whoever walks the entire length of the tape without falling off wins the game!

2. Pictionary

Try this out with your family!

If you don't have the game, *Pictionary*, write down different words on pieces of paper and drop them in a bowl. Try to make it as challenging as possible!

Ask the other player to pick up the pieces and draw it on a board without telling you what it is. Whoever guesses what the person draws gets a point.

3. Freeze

Play some music and dance to the music. Stop the music randomly and ask everyone to freeze in the position they were in.

4. Treasure Hunt

Create a Treasure Hunt for your siblings or family. Remember to think like a detective and write and place strategic clues around the house. Make your clues based on interesting memories or normal routines. Don't forget to have an exciting treasure at the end of all the clues!

5. Spider Laser Quest

Tie string, cellotape or streamers from one end of a hallway to the other. Create a web! The idea of the game is to get from one end of the web to the other without any part of your body touching the string!

Let's Have Some Fun with Math, Science and Social Studies!

Pi (π) Day

Pi is the ratio of the circumference of a circle to its diameter. The approximate value of Pi is 3.14, so every year March (the third month of the year) 14th is celebrated as Pi (π) Day. If you are a serious Math geek, celebrate this day at exactly 1.59 p.m. or a.m. so that you reach the first six digits of pi- 3.14159.

Physicist Larry Shaw started Pi Day in 1988 in San Francisco's Exploratorium to celebrate the constant π , which is also an irrational number.

Interestingly, Rajveer Meena holds the record for reciting the most number of decimal places of Pi. In 2015, Rajveer recited 70,000 decimal places of Pi blindfolded.

Here's the challenge: See if you can recite as many number of decimal places for Pi.

Nature Fun

Are you fascinated when you see the beauty of nature? Let's see how much you can find out about the world around you!

My Green Book (Herbarium of leaves)

A fun way to learn about flora is to create your own leaf herbarium. With permission pick up a leaf or a couple of leaves of different sizes, shapes, margins from different plants or trees, dry them thoroughly and stick them in an 80 pages unruled notebook or in herbarium sheets. Note down the name of the plant from which the leaf is collected, type of leaf, type of leaf margin.

Triptych Slide

Material required:

- Dark colored thick chart paper,
- 3 Thick white sheets (size of your choice),
- Pencil, Poster colors, Paint brushes, Palette

Theme: Nature

A Triptych is a set of three pictures connected with each other. Draw or paint three pictures according to the given theme using your imagination and present it as a single piece. You can Google and learn more about it before you proceed doing it.

Change Happens.

These pictures are of coins found in archaeological sites. See if you can identify the empires that used them, and what each inscription means.

Bonjour mes chers etudiants!!

Welcome to French, the language of literature and beautiful sounds. No! You are not going to learn how to say "hello" or "how are you?" in French. We will spend some time listening to a few stories in French. I am sure you are familiar with these stories in English. Shall we try to have some fun listening to them in French? Try and read along.

<https://www.thefrenchexperiment.com/stories/chicken-little>

Let's Have Some Fun with English!

A theatre is a deliberate performance created by live actors and intended for a live audience, typically making use of scripted language. Try putting up a live performance of your own! You can act it out with your siblings or create puppets! Find a script, fix a date of performance, practice the lines, prepare the costumes, send out invites or e-invites, and you can have a theatre performance in your house!

Elements of Drama

Playwright – The person who writes the play

Props – objects needed to perform the play

Cast of characters – The list of people, things or animals who are characters in the play. Their name in the script is often followed by a colon.

Scenes – a smaller section of the play. It shows us that the setting time or place has changed

Dialogue – the words a character speaks. They usually follow the character's name in the script.

Acts – a large section of the play (like a chapter)

Narrator – a special character outside the story who tells us what is happening in the story. They give us information we might not know about the story or the characters

Stage directions – Words that tell you about the setting, place, time or character actions or descriptions. It helps us understand and visualize the setting and/or the characters

Materials needed for the puppet theatre:

1. A medium sized cardboard box.
2. A scale.
3. Pencil
4. A pair of scissors
5. Glue
6. Colour papers/decorative papers

Method

1. Take the cardboard box.
 2. Using the scale and pencil, neatly mark the required screen space in the box and cut. Now the frame is ready!
 3. Decorate the frame by sticking colour papers on them. You can also choose to paint your favourite colour if you do not have colour paper.
 4. Once the frame is ready, decorate it with stickers or glitter. You can also tie a small piece of cloth on the left and right side of the frame as a stage curtain.
- The puppet theatre is ready. Now it is time to make our puppets.

Materials needed to make sock puppet:

1. A sock that is long enough to cover your arm. The sock can be any color you like.
2. Markers
3. Googly eyes (beads or buttons will also do)
4. Pompoms
5. Glue.

Method

1. Slip the sock over your hand. Once you put the sock on, make a C-shape with your hand. Put your fingers into the toe part. Try to get your thumb into the heel part. Open and close your hand. Your sock should already start looking like a puppet.
2. Use a marker to make two dots above the seam for the eyes. If you want your puppet to have a nose, make a dot for that as well.
3. Take the sock off. Spread it flat on the table. The marks for the eyes and nose may look out of place, but that's fine. This is why you made them while wearing the sock.
4. Using the glue stick the googly eye on the marked places. If your puppet is a girl, draw some eyelashes with a marker!
5. Glue a small pompom just above the seam for the nose. You can also cut a triangle or circle out of an old cloth and use that instead.
6. Add some other decorations. Your puppet is done at this point. You can still glue items onto it to give it more character. For example, you can glue some yarn to the top for hair.

Let's Have Some Fun with Music!

Use the clues to find out the Crossword Music Puzzle

ACCELERANDO

Now, see if you can find out what each of these words means/represent:

 A slow tempo _____
_____ note

D. C.  _____

A fast tempo _____

 Short, detached _____

 First note of a scale _____

W W H W WW H _____ pattern

Organization of strong and weak beats _____

Scale degree five _____

Smoothly connected _____

 _____
_____ 

 Gradually get faster _____

 Interval _____

Rest for a whole measure _____

 Moderately soft _____

 Moderately loud _____ 

To repeat the same pitch _____

 _____
Number given to each note of the scale going up _____
